

ABSTRACT

With the stoplight switch and method for its mounting in accordance with the present invention, by configuring the stoplight switch in a manner such that a contact section of a spacer projecting
5 out from a through-hole on the side surface of a case is made to come into contact with an end portion of a U-shaped engagement spring that is supported by a sliding body thereby to press the pressing section so as to move the spacer and secure the action rod and the sliding body, mounting work and adjustment of the action rod are made easy.
